Roles I am looking for: **Data Scientist, ML Engineer, Data Analyst, Risk Analyst.**

EDUCATION

University of Technology, Sydney (6.67/7 GPA)

Master of Data Science and Innovation | Academic Excellence Scholarship

Sydney, NSW

Feb 2025 – Jan 2027

KC College, HSNC University (9.0/10 CGPA)

Bachelor of Arts in Economics and Statistics

Mumbai, India

Jul 2021 – May 2024

TECHNICAL EXPERIENCE

Lou's Place

AI/ML Engineer

Sydney, NSW

Sep 2026 – Present

- Architected a tool-augmented agent that routes referral requests for food, accommodation, and other needs across multiple functions, cutting manual triage for caseworkers.
- Built the analytics dashboard giving front-desk staff real-time visibility into referral status and outcomes for vulnerable clients.

NSW Department of Education

Technical Support Assistant

Sydney, NSW

Apr 2026 – May 2026

- Delivered on-site hardware and software technical support across NSW school examinations, pre-testing systems and troubleshooting live issues to ensure zero disruption to exam delivery.

Arrayah (Blackbird Foundation)

Founding AI Solutions Engineer

Sydney, NSW

Mar 2026 – Apr 2026

- Built an NSW planning compliance checker MVP resolving live cadastre/zoning data against ~1,100 council rules via an LLM extraction pipeline, with setback geometry computed per-edge using Shapely.
- Built a companion Rhino/Grasshopper plugin to extrude compliance envelopes into 3D site masses, and deployed the full stack live on Render + Vercel.

University of Technology Sydney

Research Assistant

Jun 2025 – Present

- Built a multi-task Transformer forecasting return, volatility, VaR, and CVaR on 18 years of S&P 500 data, and ran a regime-conditioned walk-forward validation showing standard VaR calibration fails in 4 of 5 market regimes.
- Tested every static recalibration lever (cadence, threshold, window length) and proved none restores coverage across all regimes, isolating the failure to regime shift itself via model-free and single-task controls.

BUSINESS & STRATEGY EXPERIENCE

CoinDCX

Key Account Manager

Mumbai, India

July 2024 – Jan 2025

- Managed 200+ high-value accounts across founders, CXOs, FMCG, and publicly listed companies, with \$100M+ AUM, using portfolio and risk-tolerance data to guide account strategy.
- Contributed to investment product development by analyzing sales and product-penetration trends across the account base.

Intern, Growth & Strategic Alliances

Apr 2024 – Jul 2024

- Operated directly under the VP on 0 to 1 vertical building for CoinDCX Prime, targeting HNIs, family offices, and institutions.
- Owned UX strategy for the landing page and launching WhatsApp automation to scale growth marketing.

AIESEC

Head of Business Development

Mumbai, India

Oct 2022 – Feb 2024

- Restructured the BD vertical and reporting structure leading a 15-person team and 60+ entity, using partnership performance data to prioritize 7 cross-functional initiatives, driving 92% revenue growth and ~47.5% average project profitability.

Senior Marketing Manager

Jul 2022 – Oct 2022

- Ran growth experiments across a 4-person team, combining market research with conversion-rate analysis to find and scale winning acquisition channels.

PROJECTS

Airbnb Sydney ELT Pipeline

- Built a GCP ELT pipeline (Airflow, dbt, PostgreSQL) processing ~1M rows of Sydney Airbnb and Census data across 5 DAGs with a medallion architecture and SCD Type 2 snapshots.

Multi-Agent SWE Bug-Fixing System

- Designed a Planner→Coder→Tester→Judge system evaluated SWE-bench-style on 25 real GitHub issues, with a Dockerized eval harness and CI pipeline (GitHub Actions), lifting resolution 24%→40%.

Black-Scholes Options Pricing Engine

- Built a numerically stable Black-Scholes engine in Python pricing 200-contract option chains in under 5ms, validated against live Apple options data (~0.87 IV correlation) with 63 tests and a Power BI volatility surface dashboard.

AWARDS AND ACHIEVEMENTS

- One of the **Top 5 teams as finalists** among 60+ teams for my first Hackathon (Hack for Humanity).
- Awarded the **National Recognition** for Business Development in the presence of 25+ national entities for sustainability, growth, and operations.
- Awarded the **“Performer of the Quarter”** for exemplary performance and valuable impact at CoinDCX.
- Awarded by the **National Stock Exchange of India** for Research on promoting financial literacy and tackling the prevalence of financial misinformation about digital assets.

SKILLS

Programming: Python, SQL, DAX/Power Query, JavaScript

Cloud and DevOps: GCP (Cloud Composer), Docker, MLflow, GitHub Actions (CI), Render, Vercel

Machine Learning: PyTorch, TensorFlow, Graph Neural Networks, Transformers, Multi-Task Learning, LLM Agents, RAG

Data Science: Pandas, NumPy, SciPy, scikit-learn, Power BI, Excel Power Query

Databases: PostgreSQL, SQLite, FAISS (vector search)

Web Development: Flask, FastAPI, Node.js

Tools: Git, Airflow, dbt
